I. INTRODUCTION

This data summary provides selected tabular summaries of data from the U.S. decennial census. The primary dataset used in this analysis is the Census 2000 Demographic Profile #1 (DP-1) produced by the U.S. Census Bureau. DP-1 was released on a state-by-state flow basis in spring 2001, with California's version of DP-1 released May 23, 2001. The Demographic Profile #1 data product is a one-page profile report based on 100 percent count data from the census. DP-1 is essentially a first glimpse at the full set of the 100 percent count data included in Summary File #1 and Summary File #2[1]. Data is available only at the place, county and state level, not at any finer level of geography, e.g., census tracts, block groups or blocks.

Census 2000 DP-1 provides a first look at selected 100 percent count data including: population by detailed age and sex, population for Asian and Hispanic/Latino sub-groups, number of households, relationship to the head of household (or the "householder"), "group quarters" population (those living in group settings), housing units, households by tenure (owner-occupied or renter-occupied), average household size and average family size.

The geographic focus for this report is the nine-county San Francisco Bay Area, including the counties of Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano and Sonoma. Data is reported at the region, county, and place level. The term "place" includes both incorporated cities and unincorporated areas known as census designated places (CDPs.)

This data summary includes a set of main tables and appendix tables. The main tables, Tables 1 through 14, provide one-page DP-1 profiles for the San Francisco Bay Area, the nine Bay Area counties, and 1990-2000 profile pages for California and the United States.

Appendix A includes historical comparisons of DP-1 variables at county and regional levels.

Appendix B includes tables ranking Bay Area places by selected population and household characteristics.

Appendix C includes tables ranking Bay Area places by detailed Asian and Hispanic/Latino sub-groups.

Appendix D includes databases for all variables in Census 2000 DP-1 for all Bay Area places.

Maps showing the location of Bay Area cities and census designated places are included in Figures 1 through 8.

This report, MTC Data Summary #2, is the second in a series of Census 2000 reports produced by MTC staff for general use. Data Summary #1, completed October 2001, is based on the Public Law 94-171 (PL 94-171) data product released by the Census Bureau in March 2001.

---

http://www.census.gov/population/www/censusdata/c2kproducts.html

II. DISCUSSION OF RESULTS

A. County, Region, State and National Profiles (Tables 1 – 14)

DP-1 is essentially a limited database of selected Census 2000 data elements that have been assembled in one-page data profiles. The San Francisco Bay Area profile is included as Table 1. Bay Area county profiles are included as Tables 2 through 10.

The Census Bureau also has prepared 1990 profiles for all states and the United States. California profiles for 1990 and 2000 are shown in Tables 11 and 12. United States profiles for 1990 and 2000 are provided in Tables 13 and 14. These last four tables are taken directly from the Census Bureau's PDF (portable document format) profile pages for California and the United States, so are not paginated or labeled as Tables 11 through 14 in this data summary.

The full PDF and EXCEL versions of the California DP-1 product are available at the Census Bureau's Web site at:

http://www.census.gov/Press-Release/www/2001/tables/redist_ca.html#demoprofile

One of the benefits of the DP-1 data release is the ability to compare Census 2000 results at different geographic levels. The following table compares the Bay Area, California and the United States for selected socio-demographic characteristics:

Characteristic	Bay Area	California	United States
Median Age	36.6	33.3	35.3
% Population, 65+	11.2%	10.6%	12.4%
% Population, 21+	72.7%	68.3%	70.0%
% Male	49.8%	49.8%	49.1%
Average Household Size	2.67	2.87	2.59
% Owner-Occupied Units	57.7%	56.9%	66.2%
% Vacant Housing Units	3.4%	5.8%	9.0%

The Bay Area median age is slightly higher than the United States, at 36.6 years versus 35.3 years. In contrast, the share of Bay Area population 65 years and over (11.2 percent) is less than the national share (12.4 percent). The higher Bay Area median age is due to a higher proportion of Bay Area residents in middle adult ages (ages 25 to 54) and lower proportions of youth and young adults (less than 25) compared to the U.S. The state of California has a lower median age (33.3 years) than the Bay Area or the United States due to a high share of youth and young adult age population, and lower shares of adult age persons.

The male/female ratio in the Bay Area is similar to that of California and of the United States.

The average household size in the Bay Area (2.67 persons per household) is slightly higher than the U.S. average (2.59 persons per household) and significantly lower than the California average (2.87 persons per household).

The Bay Area and California have a lower proportion of owner-occupied households than the United States. In 2000, 57.7 percent of Bay Area households were owner-occupied; in California, 56.9 percent; and in the United States, 66.2 percent.

One indicator of the demand for housing is the share of housing units that are vacant – the higher the demand, the lower the percent of vacant units. The Bay Area vacancy rate (3.4 percent of housing units vacant) is significantly less than the California (5.8 percent) and United States rates (9.0 percent).

Another set of DP-1 data that is significant for the Bay Area is population by Asian sub-groups. The following table shows the Bay Area, California and United States shares of total population by Asian sub-groups:

Characteristic	Bay Area	California	United States
% Asian, alone	19.0%	10.9%	3.6%
% Asian, alone or in combination with other races	20.9%	12.3%	4.2%
% Asian Indian	2.1%	0.9%	0.6%
% Chinese	6.9%	2.9%	0.9%
% Filipino	4.7%	2.7%	0.7%
% Japanese	1.1%	0.9%	0.3%
% Korean	0.8%	1.0%	0.4%
% Vietnamese	2.2%	1.3%	0.4%
% Other Asian	1.2%	1.2%	0.5%

The Bay Area's Asian share of total population is significantly higher than the shares for either California or the United States. By Asian sub-group, the Bay Area's shares are significantly higher than U.S. shares for all groups, and higher than California for all Asian sub-groups except for Korean (0.8 percent of Bay Area and 1.0 percent of California population) and other Asian (1.2 percent for both the Bay Area and California.)

Overall, the Bay Area is home to just 2.4 percent of the nation's total population (6.8 million out of 281 million). In contrast, the Bay Area is home to 19.3 percent of the nation's Chinese population, 17.4 percent of the nation's Filipino population, and 13.0 percent of the nation's Vietnamese population. Also, the Bay Area is home to 9.4 percent of the nation's Japanese population and 8.5 percent of the nation's Asian Indian population.

Comparing the Bay Area to California, the Bay Area is home to 20.0 percent of California's total population (6.8 million out of 33.9 million). In contrast, the Bay Area is home to 48 percent of the state's Chinese population, 46 percent of the state's Asian Indian population, 35 percent of the state's Filipino population and 33 percent of the state's Vietnamese population.

The Bay Area is home to just 16.4 percent of California's Korean population. The majority of the California Korean population reside in Los Angeles County (186,000 out of 346,000).

B. Bay Area Historical Comparisons (Appendix Tables A.1-A.7)

Bay Area regional comparisons for selected characteristics, 1980 to 2000, are shown in Appendix Tables A.1 through A.3. Bay Area population by age, 1940 to 2000, is provided in Table A.4.

The male-to-female balance in the Bay Area has been relatively stable over the past 20 years. The male share of total population in 1980 was 49.1 percent; in 2000, 49.8 percent (Table A.1).

The median age in the Bay Area has increased over the past 20 years, from a 31.3 years median age in 1980, to 33.7 median years in 1990, and now at 36.6 years median age in 2000. This is due to significant increases in the adult (ages 25 to 59) and senior (ages 60 and over) population, and significant decreases in the teen and young adult (ages 15 to 24) population.

The number of Bay Area persons age 65 and over has increased from 533,000 persons in 1980, to 664,000 persons in 1990, and is now at 758,000 persons in 2000. The Bay Area share of persons age 65 and over has increased from 10.3 percent of total population in 1980, to 11.0 percent in 1990, and to 11.2 percent of total population in 2000.

Detailed Bay Area Hispanic/Latino and Asian sub-groups are reported in Table A.2. Only selected sub-groups are included in this DP-1 product. The other detailed sub-groups will be included in the Census 2000 Summary File #1.

The Bay Area's Hispanic/Latino population increased by 46.3 percent in the 1990s, increasing from 899,000 persons in 1990 to 1,315,000 persons in 2000. The fastest growing Hispanic/Latino group is Mexican, with the Mexican ethnicity population increasing 52.0 percent between 1990 and 2000. Much slower growing are the Bay Area's Puerto Rican (0.7 percent growth in the 1990s) and Cuban (11.8 percent growth in the 1990s) populations.

The Bay Area's Asian population increased by 45.3 percent in the 1990s, increasing from 888,000 persons in 1990 to 1,290,000 persons in 2000. The fastest growing Asian group is Asian Indian, nearly tripling in population between 1990 and 2000. The Bay Area's Asian Indian population has increased by 680 percent over 20 years, rising from 18,000 persons in 1980, to 50,000 persons in 1990, to 143,000 persons in 2000. In 1980, just 4.3 percent of the Bay Area's Asian community were Asian Indian. By 2000 this share had jumped to 11.1 percent of the Bay Area's Asian community.

The Bay Area's Vietnamese population is the second fastest growing Asian community, growing by 72.7 percent in the 1990s. The Vietnamese population has increased by 519 percent over 20 years, increasing from 24,000 persons in 1980, to 85,000 persons in 1990, and to 146,000 persons in 2000. The Vietnamese share of the Bay Area Asian population increased from 5.5 percent in 1980 to 11.3 percent by 2000, making the Vietnamese community the third largest Asian group in the Bay Area, trailing the Chinese and Filipino populations.

The largest Asian community in the Bay Area is Chinese. The Bay Area Chinese population increased by 41.8 percent in the 1990s, increasing from 330,000 persons in 1990 to 469,000 persons in 2000.

The second largest Asian group in the Bay Area is Filipino. The Bay Area Filipino population increased by just 24.6 percent in the 1990s, increasing from 258,000 persons in 1990 to 321,000 persons in 2000.

The fifth largest Asian group in the Bay Area is Japanese. The absolute drop in the Bay Area Japanese population, 1990 to 2000, may be due to self-reporting of two or more races. The year 2000 number of 74,500 Bay Area Japanese represents those who marked only Japanese as a race. Previous censuses included those who primarily identified themselves as any particular race. Detailed information from Census Summary File #1 will provide a tally of those who reported Japanese only, or Japanese in combination with another Asian or other race category.

The category "Other Asian" in Census DP-1 includes: Cambodian, Hmong, Laotian, Thai, other Asian, and two or more Asian categories.

Table A.2 will be amended to include other detailed Hispanic and Asian groups once data from Census Summary File #1 has been fully analyzed.

Detailed household and family characteristics for the Bay Area, 1980 to 2000, are included in Table A.3. The number of Bay Area households has increased by 9.8 percent in the 1990s, increasing from 2,246,000 households in 1990 to 2,466,000 households in 2000. The population residing in Bay Area households has increased by 13.1 percent in the 1990s, increasing from 5,870,000 persons in 1990 to 6,641,000 persons in 2000. This yields an increase in the average Bay Area household size, from 2.61 persons per household in 1990 to 2.69 persons per household in 2000.

The Bay Area "group quarters" population decreased by 7.2 percent in the 1990s, dropping from 154,000 persons in 1990 to 143,000 persons in 2000. "Group quarters" population includes both institutionalized population (e.g., correctional institutions, nursing homes, juvenile institutions) and noninstitutionalized population (e.g., college dormitories, military quarters, group homes).

The share of owner-occupied housing units in the Bay Area has increased from 55.8 percent of occupied units in 1980 to 57.7 percent of occupied units in 2000. In the decade of the 1990s, owner-occupied housing units increased by 12.4 percent, from 1,267,000 households in 1990 to 1,424,000 households in 2000. Bay Area renter-occupied housing units increased by only 6.5 percent in the 1990s, increasing from 979,000 renter households in 1990 to 1,042,000 renter households in 2000.

The average household size increased for both owner-occupied and renter-occupied households. The average Bay Area owner-occupied household increased from 2.76 persons per household in 1990 to 2.83 persons per household in 2000. The average Bay Area renter-occupied household increased from 2.43 persons per household in 1990 to 2.51 persons per household by 2000.

Bay Area population by age, 1940 to 2000, is shown in Table A.4. The Bay Area's median age was lowest in 1970 at 28.7 years of age. The median age has increased over the past thirty years to a present value of 36.6 years.

The presence of the "Baby Boomer" generation is evident in the high share of persons less than 5 years of age in both 1950 and 1960. In both the 1950 and 1960 Census, the share of population less than 5 years of age exceeded 10 percent. The Baby Boom generation also is evident in the high share of adults age 35 to 44 in the year 2000, with 17.3 percent in this age cohort.

The share of Bay Area population age 65 and over has increased steadily over the decades, from 8.1 percent in 1940, to 10.3 percent in 1980, and is now at 11.2 percent of the total population in 2000. Over the past 60 years, the total Bay Area population has increased by 291 percent. The Bay Area population age 65 and over has increased by 436 percent between 1940 and 2000, and the population age 75 and over has increased by 815 percent over this same period.

Data on households, household population and "group quarters" population was first collected in the 1940 Census. These data for Bay Area counties are included in Tables A.5 and A.6.

The historical trend in Bay Area average household size has been a general decline between 1940 and 1980 and the greatest increase in household size occurring between 1980 and 2000. Of Bay Area counties, San Francisco has the smallest average household size, decreasing from 3.08 persons per household in 1940 to 2.19 persons per households in 1980. The 2000 Census shows 2.30 persons per household for San Francisco. Marin County has the second lowest average household size among Bay Area counties, with 2.34 persons per household in 2000.

Among Bay Area counties, Contra Costa County had the highest average household size between 1940 and 1960. Santa Clara County had the highest average household size in 1970 (3.22 persons per household) and in 2000 (2.92 persons per household). Solano County had the highest average household size in both 1980 (2.82 persons per household) and 1990 (2.88 persons per household).

The Bay Area's "group quarters" share of the total population has steadily decreased from a high of 7.2 percent in 1940 to a current low of 2.1 percent of 2000 population (Table A.6). The group quarters population decreased from a high of 193,000 persons in 1940 to 121,000 persons in 1970. The group quarters population then increased to 154,000 persons in 1990, and decreased to 143,000 persons in 2000.

By Bay Area county, year 2000 group quarters share of total population ranges from 1.9 percent of Alameda County's population to 4.6 percent of Marin County's population. Santa Clara County has the largest group quarter population with 29,700 persons in 2000.

The number of households by tenure (owner-occupied versus renter-occupied) by Bay Area County, 1970 to 2000, is summarized in Table A.7. The Bay Area share of total owner-occupied housing units has steadily increased from 54.7 percent of total units in 1970 to 57.7 percent of total units in 2000.

San Francisco County has the lowest share of owner-occupied housing units, increasing from 32.9 percent owner-occupied units in 1970 to 35.0 percent owner-occupied units in 2000. Alameda County has the second lowest share of owner-occupied housing units, increasing from 51.9 percent of total units in 1970 to 54.7 percent of total units in 2000.

Contra Costa County has the highest share of owner-occupied of total units, with 69.3 percent of total units in 2000.

C. Bay Area Places Ranked by Selected Socio-Demographic Characteristics (Appendix Tables B.1-B.6)

The highest and lowest rankings of 25 Bay Area places by selected demographic characteristics included in Census 2000 DP-1 are summarized in Appendix Tables B.1 through B.6. These rankings are based on the place-level databases included in Appendix D.

Bay Area places ranked by median age are provided in Table B.1. The youngest Bay Area communities – Stanford (Santa Clara County) and Angwin (Napa County) – are college communities (Stanford University and Pacific Union College) with median ages of 22.1 and 23.9 years of age, respectively. The youngest Bay Area incorporated communities are East Palo Alto (San Mateo County), San Pablo (Contra Costa County), and Gilroy (Santa Clara County).

The oldest Bay Area communities, in terms of median age, are Temelec (in southern Sonoma County near the city of Sonoma), Yountville (Napa County) and Belvedere (Marin County).

Bay Area places ranked by average household size are shown in Table B.2. The smallest average household sizes are in Temelec, Waldon (Contra Costa County), Emeryville (Alameda County) and Sausalito (Marin County). Eight Bay Area communities have average household sizes of less than 2.0.

East Palo Alto has the highest average household size of all 183 Bay Area places, at an average of 4.20 persons per household in 2000. Other Bay Area incorporated cities with high average household sizes include Union City (3.57 persons per household), Milpitas (3.47 persons per household), Colma (3.47 persons per household) and Gilroy (3.46 persons per household).

Bay Area places ranked by percent owner-occupied units are shown in Table B.3. San Francisco has the lowest share of owner-occupied units of all incorporated cities, at 35.0 percent owner-occupied and 65.0 percent renter-occupied units. Other Bay Area incorporated cities with low owner-occupied shares of total units include Emeryville (37.1 percent), Oakland (41.4 percent) and Berkeley (42.7 percent). Five unincorporated communities have even lower owner-occupied shares of total units than San Francisco: Buena Vista, Waldon, Stanford, Cherryland, and Sunol-Midtown.

Diablo in Contra Costa County has the highest owner-occupied share of total units at 97.4 percent. Other communities with high owner-occupied share of total units include Hillsborough and Atherton in San Mateo County, and Clayton and Blackhawk in Contra Costa County.

The top 25 Bay Area places in terms of share of "group quarters" of total population are shown in Table B.4. This table also includes other Bay Area places with at least 1,000 persons residing in group quarters. Stanford has the highest share, with 46.4 percent of the communities' 13,300 population residing in non-institutional (college dormitories) group quarters. Angwin has the second highest share, with 31.0 percent of the communities' residents living in group quarters (mostly college dormitories for Pacific Union College).

The Bay Area communities with the largest institutional group quarters population are Vacaville (California Medical Facility and California State Prison-Solano) and Dublin (Santa Rita County Jail and Federal Correctional Institution).

Bay Area places ranked by share of school age (ages 5 to 24) population are shown in Table B.5. This table parallels the patterns in Table B.1 (median age) with Stanford, Angwin and East Palo Alto with the largest shares of school age population. Temelec, Sausalito and Yountville have the lowest shares of school age population.

Bay Area places ranked by share of senior (age 65 and over) population are shown in Table B.6. Temelec, Yountville and Belvedere have the highest shares of population age 65 and over. Buena Vista, Stanford and Dublin have the lowest share of senior age population.

D. Bay Area Places Ranked by Asian/Hispanic Population (Appendix Tables C.1-C.8)

The top 25 Bay Area places in terms of Asian and Hispanic/Latino sub-group share of total population are reported in Appendix Tables C.1 through C.8. These tables also include additional places with large numbers of these population sub-groups. Data is shown for sub-groups with at least 50,000 persons.

Bay Area places with high shares of Chinese residents as part of total population are shown in Table C.1. Cupertino (Santa Clara County) has the highest share, at 23.8 percent. San Francisco has the largest Chinese population of Bay Area places (152,600 persons) and is second highest in terms of Chinese share of total population, at 19.6 percent. Other places with high shares of Chinese residents include Hillsborough (San Mateo County) at 18.2 percent, Saratoga (Santa Clara County) also at 18.2 percent, Millbrae (San Mateo County) at 16.5 percent and Foster City (San Mateo County) at 16.3 percent.

San Jose city has the second largest number of Chinese residents in the Bay Area, at 51,100 persons. Fremont has the third largest number, at 29,200 persons.

Bay Area places with high shares of Filipino residents as part of total population are shown in Table C.2. Daly City (San Mateo County) has the highest share, at 31.6 percent Filipino. Hercules (Contra Costa County) is second in the Bay Area at 25.0 percent Filipino. Vallejo (Solano County) is third in the Bay Area at 20.7 percent Filipino.

San Jose city has the largest number of Filipino residents in the Bay Area, at 48,100 persons. San Francisco has the second largest concentration of Filipino, at 40,100 persons. Daly City is third with 32,700 Filipino persons.

Bay Area places with high shares of Vietnamese residents as part of total population are shown in Table C.3. Milpitas (Santa Clara County) has the highest share, at 13.0 percent. San Jose has the largest Vietnamese population of Bay Area places (78,800 persons) and is second highest in terms of Vietnamese share of total population, at 8.8 percent. Santa Clara city is third in the Bay Area at 4.7 percent. San Francisco has the second largest concentration of Vietnamese residents, at 10,700 persons.

Bay Area places with high shares of Asian Indian residents as part of total population are shown in Table C.4. Fremont (Alameda County) has the highest share, at 10.2 percent. Other communities with high share of Asian Indian residents include Sunnyvale (10.0 percent), Cupertino (8.7 percent), Santa Clara (8.6 percent) and Union City (8.6 percent). San Jose has the largest Asian Indian population of Bay Area places (26,600 persons).

Bay Area places with high shares of Japanese residents as part of total population are shown in Table C.5. Cupertino has the highest share, at 4.6 percent. Other communities, also at 4.6 percent Japanese residents, include El Cerrito in Contra Costa County and Foster City in San Mateo County. San Jose has the highest number of Japanese residents, at 11,500 persons, followed by San Francisco with 11,400 persons.

Bay Area places with high shares of Korean residents as part of total population are shown in Table C.6. Cupertino has the highest share, at 4.2 percent. Albany (Alameda County) is second at 4.1 percent, Angwin (Napa County) is third at 3.9 percent and Stanford is fourth at 3.6 percent.

San Jose has the highest number of Korean residents, at 9,400 persons, followed by San Francisco with 7,700 persons.

Bay Area places with high share of "Other Asian" residents as part of total population are shown in Table C.7. The top three communities are in western Contra Costa County: San Pablo (4.8 percent), Bayview-Montalvin (3.8 percent), and Rollingwood (3.8 percent). Detailed information on the Cambodian, Hmong, Laotian, Thai and two or more Asian groups will be provided with the release of Census 2000 Summary File #1.

The Bay Area places with the highest share of Asian population are Milpitas (51.8 percent), Daly City (50.7 percent), Cupertino (44.4 percent), Union City (43.4 percent), Hercules (42.7 percent) and Fremont (37.0 percent). These percentages are based on both Hispanic Asians and non-Hispanic Asians.

The Milpitas Asian population is very diverse, with 28.9 percent of the Asian population being Filipino, 24.9 percent Chinese, and 25.2 percent Vietnamese. The Daly City Asian population is predominantly Filipino (62.3 percent), with 26.8 percent of the Asian population Chinese.

The majority (53.6 percent) of Cupertino's Asian population is Chinese, while 19.6 percent are Asian Indian, 10.4 percent Japanese and 9.3 percent Korean.

The plurality (43.4 percent) of Union City's Asian population is Filipino, while 20.4 percent are Chinese and 19.8 percent Asian Indian.

The majority (58.6 percent) of Hercules' Asian population is Filipino, while 21.5 percent are Chinese and 8.6 percent Asian Indian.

Fremont's Asian population is very diverse, with 38.9 percent of the total Asian population being Chinese, 27.6 percent Asian Indian and 15.7 percent Filipino. Fremont has the third largest Asian population in the Bay Area, at 75,200 persons.

San Jose has the largest Asian community of Bay Area places with 240,400 Asian persons out of a total population of 894,900. The San Jose Asian population is very diverse, with 32.8 percent of the Asian population being Vietnamese, 21.3 percent Chinese, 20.0 percent Filipino and 11.1 percent Asian Indian.

San Francisco has the second largest Asian community of Bay Area places with 239,600 Asian persons out of a total population of 776,700. The San Francisco Asian population is predominantly Chinese (63.7 percent), with Filipinos the second largest San Francisco Asian group at 16.7 percent.

Oakland is the third largest city in the Bay Area (399,500 persons) and has the fourth largest Asian community in the region (60,900 persons). The majority of the Oakland Asian population is Chinese (52.3 percent), followed by Vietnamese (14.2 percent) and other Asian (13.6 percent).

Bay Area places with the highest share of Mexican ethnicity population are shown in Table C.8. The Seven Trees census designated place, in south central Santa Clara County, has the highest Mexican share of total population at 60.4 percent. Seven Trees is followed by Alum Rock (east

of San Jose) at 58.3 percent, North Fair Oaks (southern San Mateo County) at 55.5 percent, and Buena Vista (central Santa Clara County) at 52.3 percent.

Bay Area incorporated places with the highest shares of persons of Mexican ethnicity are: East Palo Alto (49.3 percent), Gilroy (46.4 percent), Calistoga (34.1 percent) and San Pablo (31.7 percent).

San Jose has the largest Mexican population at 221,100 out of a total population of 894,900. Other communities with large Mexican populations include Oakland (65,100 persons), San Francisco (48,900 persons) and Hayward (34,000 persons).

E. Bay Area Places Database (Appendix Tables D.1-D.9)

The entire DP-1 database for Bay Area places is included as Appendix Tables D.1 through D.9. Each table is five pages in length.

Table D.1, Age and Sex #1, includes data on population by sex and population by age, up to age group 60 to 64.

Table D.2, Age and Sex #2, includes population by age for age cohorts 65 and over, and population by sex for persons age 18 and over, and ages 65 and over.

Table D.3, Race and Ethnicity #1, includes population by race and ethnicity and includes most of the Asian race details.

Table D.4, Race and Ethnicity #2, includes the balance of the Asian race categories, the Hawaiian and Pacific Islander groups, and the first variables related to two or more race categories. The variables "White Tally" and "Black Tally" refer to persons who reported "White" and any other race in combination with white, or "Black/African American" and any other race in combination with Black/African American.

Table D.5, Race and Ethnicity #3, includes the balance of the racial "tally" variables and the detailed Hispanic/Latino groups.

Table D.6, Relationship, includes population characteristics of persons in households.

Table D.7, Households & Group Quarters #1, includes details on the "group quarters" population, and some of the household and family variables.

Table D.8, Households & Group Quarters #2, includes the balance of the household variables, including average household size and average family size.

Table D.9, Housing Occupancy, includes the variables related to housing units, vacancy rates, and owner/renter tenure statistics.

III. DATA AVAILABILITY AND CONTACT INFORMATION

This data summary was written in Microsoft WORD, version 2000. The data tables are in Microsoft EXCEL workbooks, also version 2000. These WORD and EXCEL files are available for downloading from MTC's Internet site. Point your Web browser to:

ftp://ftp.abag.ca.gov/pub/mtc/census2000/datasummary/

The general Census 2000 Internet site maintained by MTC and the Association of Bay Area Governments (ABAG) is available at:

http://www.census.mtc.ca.gov/ or
http://www.census.abag.ca.gov/

These sites will be updated to include various maps, databases, profile summary reports and other items of interest to the census data user.

The data user also may want to investigate the Census Bureau's American FactFinder to find other detailed Census 2000 results. Users should point their Web browsers to the following Web site:

http://factfinder.census.gov/

For more information on this data summary or other Census 2000 issues or to request an older version of this WORD document or EXCEL workbooks, please contact the report author, Chuck Purvis, at 510-464-7731, or e-mail: cpurvis@mtc.ca.gov.

[1] Census 2000 terminology and categories are used for data on race. Because individuals could report only one race in the 1990 census and could report one or more races in Census 2000, data on race for 1990 and 2000 are not comparable. See "Population by Race and Hispanic or Latino Origin for the United States: 1990 to 2000," (PHC-T-1). At <www.census.gov>, select Population Tables/Reports, then select List of Tables.

[2] Census 2000 terminology is used for ethnic categories. The corresponding term for "Hispanic or Latino" in the 1990 census was "Hispanic origin."

[3] Sample data on unmarried-partner households, as shown in U.S. Bureau of the Census, 1990 Census of Population, Social and Economic Characteristics (1990 CP-2), report series published 1993-1994.

[1] Census 2000 terminology and categories are used for data on race. Because individuals could report only one race in the 1990 census and could report one or more races in Census 2000, data on race for 1990 and 2000 are not comparable. See "Population by Race and Hispanic or Latino Origin for the United States: 1990 to 2000," (PHC-T-1). At <www.census.gov>, select Population Tables/Reports, then select List of Tables.

[2] Census 2000 terminology is used for ethnic categories. The corresponding term for "Hispanic or Latino" in the 1990 census was "Hispanic origin."

[3] Sample data on unmarried-partner households, as shown in U.S. Bureau of the Census, 1990 Census of Population, *Social and Economic Characteristics* (1990 CP-2), report series published 1993-1994.

The group quarters population includes all people not living in households. Two general categories of people in group quarters are recognized: 1) the institutionalized population, which includes people under formally authorized, supervised care or custody in institutions at the time of enumeration (such as correctional institutions, nursing homes, and juvenile institutions) and 2) the noninstitutionalized population, which includes all people who live in group quarters other than institutions (such as college dormitories, military quarters, and group homes).
